No. D-8/486

The Principal Secretary
Department of Industries
Govt of Bihar
Patna-800 001

Dear Sir,

M/s Deepak Vegpro (P) Ltd., Durgawati, Dist. Kaimur, one of the steamed members of the Association, has continuously been representing us that the unit has been facing severe problems due to a set up of 11/33KV power sub-station of the South Bihar Power Distribution Company (BSEB) within the premises of the factory and HT overhead line spread over the entire land of the factory.

Due to naked wire passing through overhead of Staff Quarters in the factory and near Hydrogen Gas Storage Tanks, possibility of accident always prevails and management is working in tense and fearful environment. Besides recent accident of electrocution of worker due to sudden fall of electric wire of 11KVA on 9th June, two accidents of electrocution had already happened in the premises in which guard in the factory premises seriously injured and the company had to meet lakhs of rupees over treatment.

Existence of Power Sub-Station, inside the campus of the unit is hindering expansion of the unit and is pending for long.

The Company has presenting the matter to the authorities, but it remained unattended and unresolved. We have written a letter to the MD – SBPDCL which is enclosed herewith for your perusal and reference.

We, therefore, request you to kindly to take up the matter at your level with the authority concerned for redressal of the continued problem to the unit.

Thanking you,

Yours faithfully,

(K. P. S. Keshri)
President
